GRADUATE SCHOOL OF BUSINESS · MBA PROGRAM

Marketing Strategy of Pertamax Green 95: Pre-Defense Proposal

Research on the Marketing Strategy of Pertamina's Pertamax Green 95 in the Indonesian Market

Candidate: **Id Arifandi · [NIM]**
Supervisor: [Prof. Dr. Name]
Date: [DD Month 2026]

PRE-DEFENSE PROPOSAL

Presentation outline

Northeastern University

01 Research Background

Industry context, green fuel transition, and why Pertamax Green 95 matters.

02 Problem Statement & Objectives

Research questions, objectives, scope, and significance.

03 Literature Review

Theoretical foundation: STP, marketing mix (7P), consumer behavior.

04 Research Methodology

Design, data sources, sampling, and analysis framework.

05 Preliminary Findings & Plan

Expected outcomes, contribution, and research timeline.

GOAL OF THIS DEFENSE

Obtain committee feedback and approval to proceed with the full research on Pertamax Green 95's marketing strategy for the Indonesian market.

01

PART ONE

Research Background

Context of Indonesia's fuel market and green energy transition

PART ONE · RESEARCH BACKGROUND

Fuel market shifting toward cleaner energy

Northeastern University

[XX]%

Fuel demand growth in Indonesia, [year] — transport sector dominates consumption.

[XX]%

Pertalite market share — subsidized fuel still dominates retail volume.

RP [X]T

Government target / investment for green energy transition by [year].

WHY THIS MATTERS

Pertamina launched **Pertamax Green 95** as a bioethanol-blended gasoline (E5) to bridge the transition toward low-emission fuels in the Indonesian market.

Adoption remains below target — the core driver of this research.

PART ONE · PROBLEM STATEMENT

Adoption lags behind launch targets

Northeastern University

CORE PROBLEM

Despite national launch and Pertamina's brand strength, Pertamax Green 95 sales volume reaches only [X]% of target in [region/period].

KNOWLEDGE GAP

No prior study has examined the marketing strategy of bioethanol-blended gasoline in Indonesia using an integrated STP + 7P framework.

RESEARCH QUESTIONS

RQ1 — How is the current marketing mix (7P) of Pertamax Green 95 implemented?

RQ2 — What internal and external factors shape its market performance?

RQ3 — What marketing strategy should Pertamina adopt to increase adoption?

Objectives: (1) evaluate the current marketing mix; (2) diagnose market barriers via SWOT/PESTLE; **(3) formulate a data-driven marketing strategy** for Pertamax Green 95.

02

PART TWO

Literature Review

Theoretical foundation and conceptual framework

PART TWO · LITERATURE REVIEW

Three pillars support the analysis

Northeastern University

STP

SEGMENTATION · TARGETING · POSITIONING

Identifying priority consumer segments for green gasoline and sharpening Pertamax Green 95's positioning vs Pertalite/Pertamax. (Kotler & Keller, [year])

7P Marketing Mix

PRODUCT · PRICE · PLACE · PROMOTION · PEOPLE · PROCESS · PHYSICAL EVIDENCE

Diagnosing the current service-dominant marketing mix of a fuel retail product. (Booms & Bitner, [year])

Consumer Behavior

AWARENESS · PERCEPTION · ADOPTION

Explaining green-fuel adoption barriers: price sensitivity, perceived quality, environmental concern. ([Author, year])

Conceptual framework: **Internal & external analysis (SWOT, PESTLE, Porter) → STP → 7P strategy formulation**

03

PART THREE

Research Methodology

Design, data, and analysis plan

PART THREE · METHODOLOGY

Mixed methods: internal data plus survey

Northeastern University

RESEARCH DESIGN	Descriptive–explanatory, mixed methods (qualitative + quantitative)
UNIT OF ANALYSIS	Pertamax Green 95 marketing program, Pertamina [Region/Area]
PRIMARY DATA	Consumer survey (n = [X], purposive sampling) + in-depth interviews with [X] Pertamina marketing staff
SECONDARY DATA	Internal sales volume, pricing and distribution data; industry reports; ESDM regulations
ANALYSIS TOOLS	SWOT + QSPM (strategy prioritization), PESTLE, Porter's Five Forces, descriptive statistics
RESEARCH PERIOD	[Month Year] – [Month Year]

PART THREE · PRELIMINARY OBSERVATIONS

Early signals from internal and field data

Northeastern University

[X.X] M

Pertamax Green 95 sales volume (KL) in [period] — versus target of [X.X] M KL.

[XX]%

Consumer awareness of Pertamax Green 95 in preliminary field check (n=[X]).

WORKING HYPOTHESES

H1: Price premium over Pertalite is the primary adoption barrier for price-sensitive segments.

H2: Low promotion intensity and limited distribution coverage suppress trial and repeat purchase.

PART THREE · PLAN

Timeline and expected contribution

Northeastern University

TIMELINE

Data collection & survey
[Mon–Mon 2026]

Analysis (SWOT, QSPM, STP)
[Mon–Mon 2026]

Strategy formulation & writing
[Mon–Mon 2026]

Thesis defense
[Month 2026]

EXPECTED CONTRIBUTION

Academic — first integrated STP + 7P study of bioethanol-blended gasoline in Indonesia.

Practical — an actionable, prioritized marketing strategy roadmap for Pertamina to accelerate Pertamax Green 95 adoption and support the national energy transition.

Q & A

Thank you — feedback and suggestions are welcome.

Research on the Marketing Strategy of Pertamina's Pertamax Green 95 in the Indonesian Market
